Aims of the Homeworkers’ Network:

- To provide a support network for employees who work at home.
- To support employees who move from office-based to home-based working.
- To promote the benefits of homeworking.
- To raise awareness of the issues related to homeworking.
- To prevent ‘professional isolation’.
- To mentor, develop and motivate staff, and increase confidence.
- To keep homeworkers informed about what is going on across the organisation.
- To ensure the wellbeing of staff and gauge stress levels.

How we do this:

- By inviting all homeworkers to our regular sessions.
- By giving homeworkers the opportunity to share ‘top tips’ and useful working practices.
- By enabling homeworkers to raise issues and work together to resolve these.
- By inviting colleagues to support and advise homeworkers on relevant topics.
- By networking with colleagues in other departments.
- By setting up a buddy network to help new and existing staff settle into homeworking.
- By creating a network of colleagues who can act as a sounding board for homeworkers’ issues.
